

BFS218

Racism and the Digital Age

Understanding Techno-Racism

A short, friendly map to your course site:
what it is, where everything lives, and how
to run a fully asynchronous course on your
own terms.

BFS218

BFS218 Asynchronous Course Site

This instructor-created site carries the weekly teaching for the fully asynchronous section of BFS218. Open it from Blackboard or use the public address in this guide.

Your whole course, in one site

This is the course site for the fully asynchronous section of BFS218. There are no live classes: the weekly teaching happens here, through walkthroughs, readings, concepts, activities, and checks, and you set the pace between two fixed due dates, October 25 and December 11. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every source, concept, and self-check in one spot
- Where the weekly teaching happens, beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

PRIVACY, ACCESSIBILITY, AND COPYRIGHT

Use it alongside Blackboard

This site does not require an account, does not collect student submissions, does not store grades, and does not send personal student information to the instructor, Seneca, or any server. The optional first name, notes, and check answers stay in this browser only, and browser storage can be cleared at any time: treat everything you type on the site as temporary and download what you want to keep. External media players may be subject to the privacy practices of the host platform.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

The menu is the map

The left-hand menu is the entire site. Here is every door and where it leads.

BFS218, navigation	
TOP OF THE MENU	
01 Home You set the pace: the journey week by week, your driven-weeks progress, and this week	02 How This Site Works What the site is, what it is not, privacy, and the Clear my saved work control
03 Calendar and Due Dates Every date on one page, the current on-site Coming up banner, and the 11:59 p.m. Eastern Time deadline rule	
LEARN EACH WEEK	
04 Weekly Walkthroughs Your lectures: the narrated deck for each teaching week, 2 to 12	05 Course Pathways How a week runs when you drive it yourself
STUDY THE SOURCES	
06 Readings and Media Every assigned source, as a searchable card	07 Source Practice Turn any source into practice questions, with a lens
08 Compare Sources Hold up to three sources side by side, every idea attributed	09 Videos and Podcasts Scholar media, loaded only when you choose to play
10 Glossary Every key term, always cited to its reading	11 Concept Flashcards Flip cards for every week, never scored
DO THE WORK, AND MORE	
12 Starting Your Assignment All five assessments, what each asks, and the two due dates	13 Career Choices The whole course reframed through your own program
14 Course Website Instructions This guide, online and as a PDF, plus a Report a problem button that emails the instructor	

The course as a journey

Home opens with the plain statement of how this section works: **you set the pace, within the deadlines.**

Under it, the journey lays the course out week by week, each station carrying the week's title and its **guiding question**, and a progress line counts the weeks you have driven. Under it, two window cards track your due-date windows in real time (open, days left, closed), and a pace note tells you honestly where the calendar sits relative to your driving, with the shortest way back when you want it. A week counts as driven once you tick its four steps in the YOU DRIVE THIS WEEK checklist on the week page.

- 1 Click any week station to open that week's page.
- 2 Coming back later? The site reopens where you left off on this device. Treat that as a convenience, not storage: anything you want to keep, download it.

The screenshot shows the Seneca BFS218 Companion website. The header includes the Seneca Polytechnic logo, the course title 'BFS218 Companion', a search bar labeled 'Reading Lens', a 'Listen' button, and course details: 'ASYNCHRONOUS · SELF-PACED' and 'FALL 2026'. The left sidebar contains navigation links: 'Home' (selected), 'How This Site Works', 'Calendar and Due Dates', 'LEARN EACH WEEK', 'Weekly Walkthroughs', and 'Course Pathways'. The main content area features a dropdown menu for 'See this course through your program:' set to 'General stream / no program'. Below this is a 'Next due' notification for 'Map Exchange checkpoint, Coded Encounter, Canadian Case File' on 'October 25', with a 'See all dates --' link. At the bottom of the main content area is a large image showing a diverse group of people looking forward.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

BFS218 asks how racism travels through technology, and that question lands differently depending on where you are headed. Right on Home you can reframe the whole course around your own program of study, so techno-racism shows up in the tools and systems your field builds and uses every day.

- 1 On Home, find the control that says **See this course through your program**. Pick your program from the dropdown of Seneca programs, grouped by area of study. You can also pick a whole area, or choose **Still exploring**.
- 2 You stay on Home. Nothing navigates away. A short **For your field** panel appears at the top, tying the whole course to your program.
- 3 Each week on the journey gains its own short **For your field** line, and the weeks that matter most to your field are marked **Key for your field**.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how techno-racism connects to that field, and how to use the lens in course work.
- 5 A small chip at the top shows **Viewing as your program**, with a way to change it or turn it off during the current session.

A lens, not a different course

Every student reads the same readings and does the same assessments. The lens only changes how the course is framed for you, it never changes what is required. You can turn it off any time, and the chip at the top of the page is how you do it.

Anatomy of a week

Every week page runs in the order the week is meant to run. Work it top to bottom.

This week in 80 seconds. Content weeks open with a short animated overview under the week title, made with NotebookLM from that week's readings and reviewed by your instructor. Captions available on the player. It is a fast on-ramp into the week, not a substitute for the readings.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. Nothing is recorded or graded; your notes stay in your own browser.

Knowledge Check. Every week closes with an optional, never scored self-check. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. Nothing is recorded; clear or change any answer and take another set fresh.

- 1 **Time budget**, under the title, roughly how the week's work divides up.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Walkthrough**, a slide deck embedded on the page. Arrow keys move through it, or open it fullscreen.
- 8 **The Activity**, press Start and follow the prompts. Practice, not assessment.
- 9 **Reflect**, a short prompt (one or two sentences) to close the week.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

A WEEK PAGE · EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every source, as a card

The library holds every course reading: what it is, what it argues, how long it takes, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. It stays on this device so you can return before an assessment.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE · CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

COMPARE SOURCES

Hold up to three sources side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, level, and core idea.
- 3 With two or more selected, press **Synthesize their relationship**. The site explains how they speak to each other, every idea attributed.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

EACH PAIRING EXPLAINED, EVERY IDEA ATTRIBUTED

Turn any source into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

GLOSSARY

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

CONCEPT FLASHCARDS

Practice, never scored

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- For question practice, each week page closes with its own Knowledge Check. Nothing is recorded; it exists so you know what to reread before it matters.

Weekly Walkthroughs hub. The decks for Weeks 2 to 12 all live in one place. Open Weekly Walkthroughs from the menu and pick the week to rewatch without hunting.

HANDS-ON

The studios & labs

Alongside the weekly activities, the site carries hands-on labs. Each one tells you what you are doing and why before you start. Nothing in them is graded.

Evidence Transfer Lab

Move a claim from source to argument, deliberately.

Accountability Chain Lab

Trace who answers for a harm, link by link.

Self-Check Studio

Package your studio work as a Word document to keep.

THREE MORE WAYS INTO THE LIBRARY

Browse it however you think

By week

Everything, week by week.

Tiles

The whole library as a wall you can scan.

Index

The alphabetical list.

GOOD HABITS FOR THE TERM

A rhythm that works

STEP 1

Open the week page early and read the overview.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

Step through the walkthrough.

STEP 4

Do the activity.

STEP 5

Tick the You can now checklist honestly.

Before each assessment, use **Compare** on the readings you plan to write about, and run the **Knowledge Check** at the end of those weeks.

PRACTICAL NOTES

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- Your saved shelf, notes, and check answers live only in your own browser, on your own device.
- Clearing browser data clears them, and they do not follow you between devices.
- If the site looks stale after an announced update, refresh the page once.

THE ONE RULE THAT MATTERS

When in doubt, Blackboard wins.

BFS218 asynchronous course site. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

Where to go for what

Start this week's work	Home ► click the week ► work top to bottom
Find a source fast	Readings and Media ► search or week strip
See how sources connect	Compare Sources ► pick up to three
Test yourself on a source	Source Practice ► pick a lens
Look up a term	Glossary ► search
Drill before an assessment	Concept Flashcards ► pick the weeks
Rewatch the week's deck	Weekly Walkthroughs ► pick the week
Submit anything / check grades	Blackboard, always

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place, and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Your choices save only in your browser, stay on until you change them, and a Reset all supports button returns everything to default.

Do not save your work on this site. Notes and check answers are never submitted, and never treat them as saved: they live only in this one browser and can be lost to a cleared cache, a different device, or a lab computer reset. Draft anything graded in your own documents, and at the end of any week download your notes with **Generate Your Weekly Notes**. On a shared or lab computer, the How This Site Works page has a one-click **Clear my saved work** control.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. The home page opens with a small panel that reads only what you have already done on this device (weeks opened, checks tried, reflections written) and offers up to three next steps. It uses a few fixed rules, not AI, and nothing about you leaves your browser. You can add your first name so the site greets you; the name stays in this browser only, is never sent anywhere, and Clear my saved work removes it along with everything else.

Coming up and phone access. The current schedule stays at the top while you move through the site. Pause freezes the message exactly where it is and keeps the text visible. The first visit in a browser also opens a short reminder. On a phone, Calendar and Due Dates offers a live calendar subscription. How This Site Works gives you the same site link to share or copy to another device. Blackboard remains the official source if a date changes.

Work inside every 3D activity. Each week uses the visual style that best fits its task: technical inspection, workshop, civic policy, or cartographic mapping. Drag to turn the scene, pinch or scroll to zoom, or use the view buttons. The default view shows the whole environment. Numbered explanations sit below the model so they do not block the evidence. Weeks with simulations let you change inputs, run repeated trials, and compare uncertain outcomes. A positive result can occur, but the underlying rules still shape which outcomes are more likely. The walkthrough uses the same week model so the teaching and activity stay aligned.

If something breaks. Weekly Walkthroughs open inside the site with the menu still beside you. If a model, recording, or video will not load, or anything looks wrong, use Report a problem on How This Site Works. It opens an email to the instructor with the page details filled in. No phone number is shown. If the site is unavailable, everything required for the course is also on Blackboard.

Privacy. Nothing on this site contacts an external service until you choose to load or play a video; when you do, YouTube's privacy-enhanced player applies its own practices inside its frame.

Experiments. Most weekly activities in BFS218 open with a short experiment: commit to a prediction, run it, read what actually happened, and see your own prediction mirrored back. The mirror names the thinking move you used, and across weeks it shows the pattern in your first instincts. It is never graded and never leaves your browser.
